

Flow-Liner®

“Serves the Volunteers”

With a Pipe Lining Technology Answer

History

Volunteers of America was founded in 1896 by social reformers Ballington and Maud Booth. Today, Volunteers of America is one of the nation’s largest and most comprehensive human services organizations, touching the lives of more than 2 million people in over 400 communities in 46 states, as well as the District of Columbia and Puerto Rico each year. Over the years, they have supported and empowered America’s most vulnerable groups, including veterans, at-risk youth, the frail elderly, men and women returning from prison, homeless individuals and families, people with disabilities and those recovering from addictions.

Problem/Issue

The Indiana chapter of Volunteers of America contacted a Flow-Liner® Installer regarding a 4 inch cast iron sanitary sewer pipe that was cracked with corrosion and scale build-up that was causing the line to back-up. The pipe was located under the concrete foundation of the building. The facility is a residential facility that houses homeless veterans 24/7, therefore, digging and replacement was not an option.

Solution

Using Flow-Liner® technology, a Flow-Liner Certified Installer prepared and installed the Flow-Liner® Cured-in-Place Pipe Lining System and reinstated one tap using a robotic cutter.

Results

The 4 inch cast iron sanitary sewer pipe was successfully lined using Flow-Liner® technology. The Regional Program Director was very pleased with the results and commented:

“The pipe lining crew was very professional and courteous to our staff, residents as well as the other contractors working on the project. They did a great job in a timely manner which was critical for our organization. The pipe lining saved us from not only having to dig up and replace the piping, which would have been very costly, but from closing our facility to residents for several weeks, if not months.”
