

Flow-Liner® Systems

“Lands the Job”

With A Pipe Lining Technology Answer

Problem:

GAL Land Company, building owner of the Smith Bits drill bit company, discovered a pipe lining need for several of their drain pipes. They contacted a Certified Flow-Liner® Installer.

Solution:

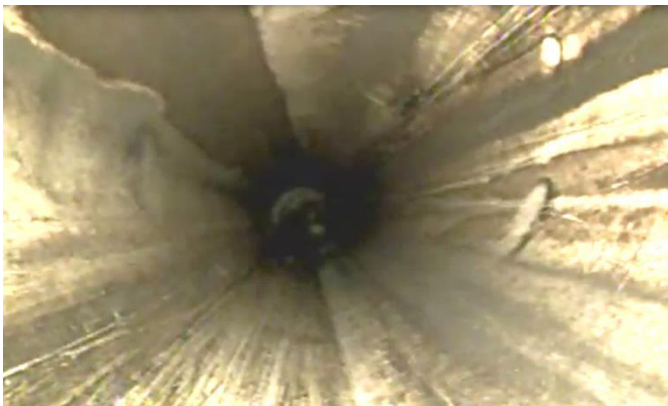

A Certified Flow-Liner® Installer using the Flow-Liner® Drain Inversion™ System, a Cured-in-Place-Pipe lining method, lined the drain pipes. After navigating many bends and reinstating branch lines, the air test came back leak free- a success.

Cured-in-Place-Pipe Lining in Progress

“Your product was a solution to our problem and it was convenient, affordable, and resulted in no down time in our operations. In the oil and gas industry – that means everything.”

-GAL General Manager

Before Flow-Liner®

After Flow-Liner®

We are pleased to announce another successful project and proudly add

GAL Land Company and Smith Bits
to our list of happy and satisfied customers.
