

# Flow-Liner®

## “Keeps the Service Flowing” With A Pipe Lining Technology Answer

### History

Ray Kroc discovered a small burger restaurant in California in 1954. The restaurant was run by brothers Dick and Mac McDonald with a limited menu of burgers, fries, and beverages with a focus on quality and quick service. Kroc presented his vision of creating McDonald's restaurants all over the U.S. to the brothers and in 1955, he founded McDonald's System, Inc., the predecessor of the McDonald's Corporation. Six years later he bought the exclusive rights to the McDonald's name. McDonald's will celebrate its 60<sup>th</sup> Anniversary in April 2015.

### Problem/Issue

The McDonald's restaurant had problems with one of their underground PVC drain pipes. The pipe was televised and a break in the 4" drain pipe was identified as the culprit. The restaurant operates 24 hours a day and wanted to avoid disruption to their operations if at all possible.

### Solution

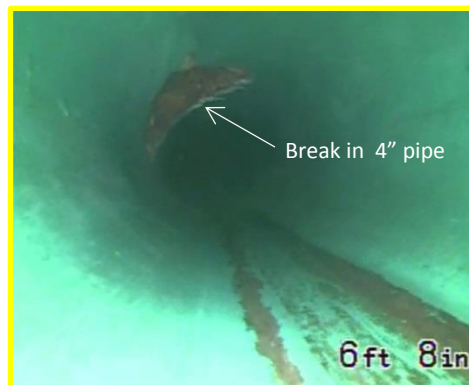

Using Flow-Liner® technology, a Flow-Liner Certified Installer prepared and installed the "Flow-Liner® Cured-In-Place Pipe Lining System".

### Results

The drain pipe was successfully lined without disruption to the operations at the McDonald's Restaurant. **The McDonald's representative indicated they were happy with the results of the pipe lining.**

Flow-Liner equipment set-up for installation

4" Drain pipe before Flow-Liner installation

4" Drain pipe after Flow-Liner® Installed

We are pleased to announce another successful project and proudly add  
**McDonald's Restaurants of Ohio, Inc.**  
to our list of happy and satisfied customers.
