

# Flow-Liner<sup>®</sup> Systems

“Cares for Your Pipes”

With A Pipe Lining Technology Answer

## Problem

ManorCare Health Services, located in Sinking Spring, Pennsylvania, found themselves in a concerning situation when they discovered the drain piping system under their concrete floor was in need of repair or replacement.

## Solution

ManorCare’s contracting company, Vision Mechanical, sought out a certified Flow-Liner<sup>®</sup> Installer with hopes to avoid excavation by using trenchless technology.

## Result

The certified Flow-Liner<sup>®</sup> Installer lined the pipe using inversion with Cured-in-Place Pipe Lining, navigating through 45° and 90° bends and reinstating two branch line connections all within two days. Our happy customer stated,

*“Flow-Liner’s product was a great alternative to having to dig up and replace the piping. We highly recommend your product.”*

Before Flow-Liner<sup>®</sup>

After Flow-Liner<sup>®</sup>

We are pleased to announce another successful project and proudly add

**Vision Mechanical/ManorCare**

to our list of happy and satisfied customers.
